Password: WilsonIT (case sensitive)

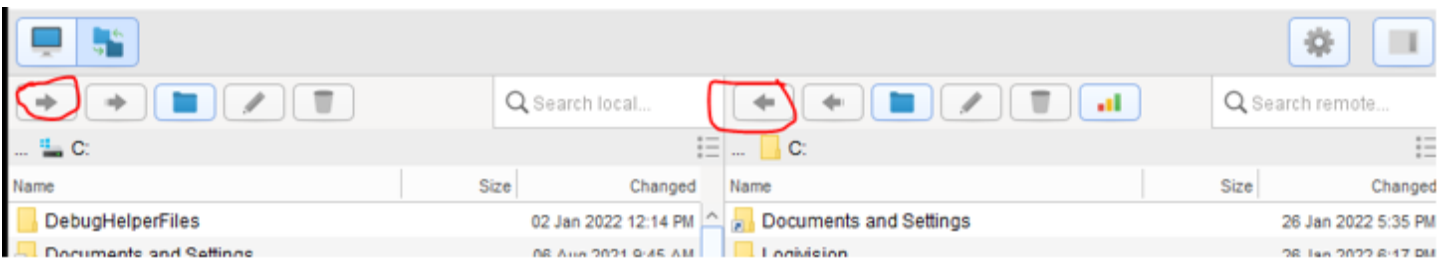

Sam Hamiltons computer will appear on selection list. A blue circle means it is in use by him. A green circle means it has not be used in several minutes. It is best to let him know you are connecting. You will both be sharing the desktop but only one person can use the computer at a time.

The slider will enlarge or shrink the remote screen so it fits inside your screen.

The dual folders let you transfer files. On the next screen, left window is your computer. The right screen is the remote computer.

Use the single arrows to transfer files. Double arrows sync whole folders so don't use it.

The clipboard is used to transfer the clipboards in both directions.
